

Comparing Solaris Collection TributeNight™ and Caresia™ Garments for the Upper Extremities

TributeNight™ Arm Garments, Gloves and Gauntlets

➤ Custom measured, designed and manufactured for each individual patient.

➤ Colour Options: Black, Teal, Red, Purple, Navy or Pink

➤ Bi-directional gradient compression.

➤ Provides approx. 20-30mmHg. Addition of optional Outer Jacket adds approx. 10mmHg for 30-40mmHg. Variable Compression Jackets are also available.

➤ Contains mixed density, medical grade foam particles ("chip" foam).

➤ Quilted chevron shapes encourage fluid flow laterally and proximally, routing fluid away from dysfunctional areas. Some styles also available in vertical channels option.

➤ Foam particles nestle into skin to provide local tissue stretch, stimulate lymphatics and help soften protein-thickened tissue and resolve fibrosis.

➤ Can begin at fingertips, MCP's or wrist; Can be made with a separate glove; Custom modifications such as zippers, Velcro closures and custom digit spacers are available. Also available in trunk and torso styles, eg. vests, shirts, bustiers, abdominal binders, etc.

➤ Sure-fit Guarantee™ assures initial fit, covers any material or manufacturing defect, and includes one complimentary reduction alteration (1-Year)

➤ Individually custom manufactured; delivery typically takes 6-12 business days; \$10 flat-rate for insured, expedited Shipping & Handling to any Canadian address

➤ Commonly covered by private insurance plans with a physician's prescription, either under compression garments coverage or durable medical equipment. Zero-rated for GST/HST with a prescription.

Caresia™ Arm Garments, Gloves and Gauntlets

➤ Available in a range of standard-sized sleeves, gloves and gauntlets.

➤ Comes in Caresia Blue only

➤ Bi-directional gradient compression.

➤ Compression depends on initial fit within range for standard size selected, and can then be customized and adjusted within therapeutic ranges (apx. 20-40mmHg) by external application of short-stretch bandaging.

➤ Contains medical grade foam particles ("chip" foam).

➤ Quilted chevron shapes encourage fluid flow laterally and proximally, routing fluid away from dysfunctional areas.

➤ Foam particles nestle into skin to provide local tissue stretch, stimulate lymphatics and help soften protein-thickened tissue and resolve fibrosis.

➤ Available in four styles for arms and hands: MCP's-to-Axilla and Wrist-to-Axilla sleeves, as well as Glove and Gauntlet styles with individual digit spacers included. Wrist-to-Axilla style can be worn in combination with the Glove or Gauntlet.

➤ Guaranteed to be free of manufacturing defects.

➤ All sizes final, but sizing exchanges may be accepted; some conditions apply.

➤ In-stock and ships within 24-hours; delivery typically takes 1-5 business days and flat-rate \$10 shipping on any sized order to any Canadian address

➤ Sometimes covered by private insurance plans with a physician's prescription, either under compression garments coverage or durable medical equipment. Subject to applicable Canadian sales taxes.
