

# Guide to Working with the TributeNight Torso Order Form

**N** length: shoulder straddle, from front waist to back waist over high point of shoulder

**O** length: around the arm at the AC joint used for forming the armhole for vests, shirts, thoracic sling wraps.

**L** circ: under arms at level of the axilla

**K** circ: over fullest chest/breast(s)

**J** circ *upper torso garment*: under breast(s)  
(as you would measure for bra band sizing)

**J** circ *lower torso*: 5 cm above waist or desired proximal ending point for waist

**H** circ: over hips or the anatomical landmark you have chosen for "H"

**G** circ: around thigh at level of gluteal fold; specify left and/or right

**F** circ: around leg(s) at mid-thigh; specify left and/or right

**B** length: crotch straddle from front to back waist; if necessary to help define body shape, take as separate anterior and posterior

## READ FIRST: IMPORTANT NOTE

For measuring all lengths, the natural waistline (Landmark "I") is zero, i.e.: use as the baseline from which you measure all other lengths.

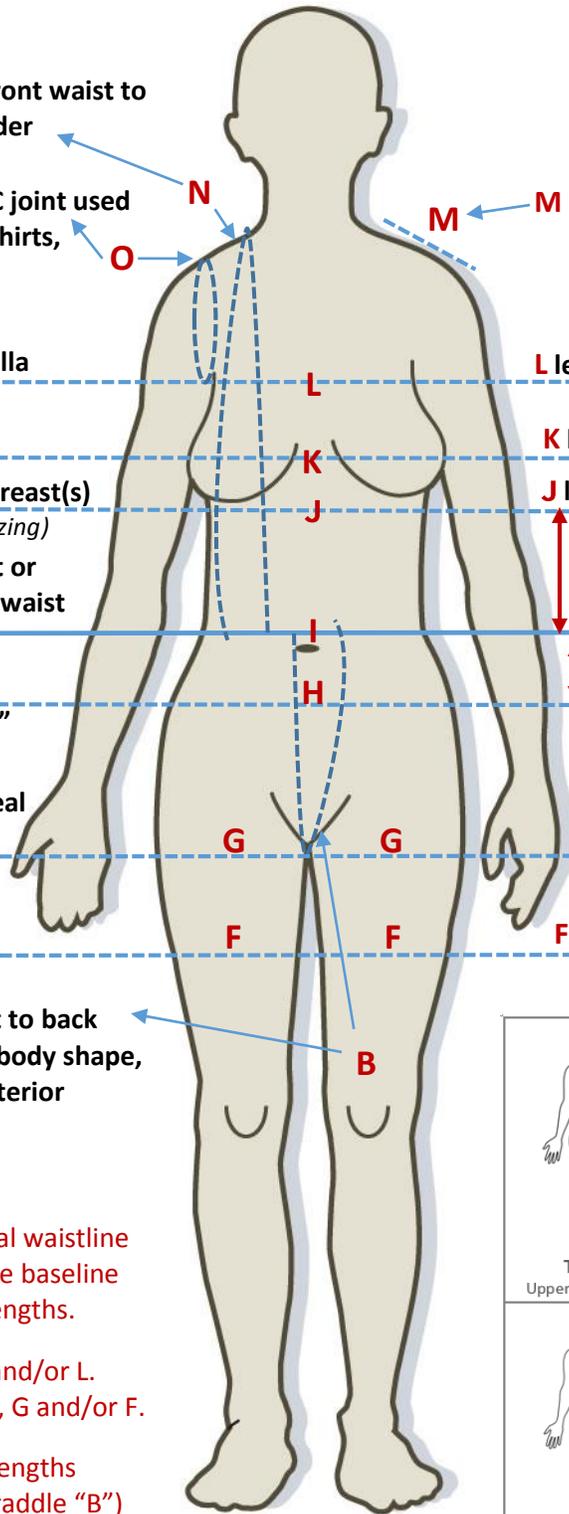

Measure up from the waist for J, K and/or L.  
Measure down from the waist for H, G and/or F.

Also measure any needed straddle lengths (Shoulder Straddle "N" or Crotch Straddle "B") from the front waist to the back waist.

Upper Torso Garments: for mastectomy without reconstruction, note this in the comments and which side if unilateral. For asymmetric body shape, it is helpful to take the J, K and L circumferences in 2 parts, left and right, from midline to midline. Use comments to note this. Thoracic Sling Wraps: indicate left or right for the unilateral chest/shoulder coverage.

Bustiers, Vests, Shirts and Dickies come standard with anterior midline zipper. Choose: round, scoop, "V" or turtle neck (except Bustier).

Abdominal Binders and Thoracic Sling Wraps come standard with Velcro-receptive fabric and Velcro closure. Use comments to request alternate closure style and for other notes.

**M** length: from AC joint to base of neck

**L** length: waist to axilla

**K** length: waist to fullest breast(s)

**J** length: waist to below breast(s)

**H** length: from waist down to desired distal ending point of garment

**G** length(s): waist down to top of leg(s) at level of the gluteal fold

**F** length: from waist to mid-thigh
