

About Solaris TributeNight™ Therapeutic Garments

If your doctor, therapist or insurance company is unfamiliar with Solaris TributeNight™ therapeutic garments, please share a copy of this information sheet with them.

- **Indications:** chronic edema, especially when accompanied by fibrosis, often due to lymphedema, lipedema, trauma, or as a complication of chronic venous insufficiency and similar conditions. If wounds are present, they must be dressed.
- **Contraindications:** include but are not limited to arterial insufficiency or degeneration, Deep Vein Thrombosis, untreated Congestive Heart Failure, active localized or systemic infection, obstructive edema such as active cancer, absence of sensation, any condition where increased fluid return is a concern. Not all of these conditions are absolute contraindications - please always consult with your physician prior to ordering Solaris TributeNight™ or any therapeutic compression garments to assess individual suitability. A physician's prescription is generally required for TributeNight™ garment claim coverage by most private insurance plans.
- **How TributeNight™ Works:** TributeNight™ directional flow garments provide gradient compression, and are custom-manufactured for each patient to provide Class II, 20-30mmHg of compression. The optional Outer Jacket adds approx. 10mmHg when worn together with the TributeNight garment to provide Class III, 30-40mmHg. The efficacy of TributeNight™ garments is due only in part to their compression values. Garment construction features quilted, bi-directional channels filled with medical grade foam particles of varying sizes, shapes and densities. This creates a localized tissue stretch and skin surface pressure differential, stimulating lymphatics, gently breaking down fibrosis, and guiding fluid and cellular waste toward collateral pathways. Solaris uses a proprietary fabric blend that is breathable, thermo-releasing, moisture-wicking and has anti-microbial properties to keep the skin cool, dry and clean. TributeNight™ is durable, effective, comfortable and machine-washable and dryer safe.
- **Superior Alternative:** TributeNight™ is a safer and more manageable alternative to the multi-layer compression bandaging protocol which is the clinical standard for the intensive phase of complex decongestive therapy and an integral part of the home management phase of treatment. TributeNight™ frees the user from the necessity of mastering the application of multi-layer compression bandaging and provides a safe, easy and effective alternative. TributeNight™ allows the user to sleep in comfort, in their natural positioning, receiving effective, therapeutic treatment while they sleep.

"Compressive bandages, when applied incorrectly, can be harmful and/or useless. Accordingly, such multilayer wrapping should be carried out only by professionally trained personnel. Newer manufactured devices to assist in compression (i.e., pull on, Velcro-assisted, quilted, etc.) may relieve some patients of the bandaging burden and perhaps facilitate compliance with the full treatment program..."

2009 Consensus Document, International Society of Lymphology.

- **Custom Made:** Each Solaris TributeNight™ garment is individually custom-measured, designed and manufactured to the patient's precise measurements and can be created to provide coverage over any involved area(s) of the body. This custom fit helps to deliver the therapeutic effects of the garment.
- **Industry Leading Warranty:** Solaris provides a Full One-Year Warranty on all TributeNight™ garments. We recommend that most patients re-order every 12-18 months. Custom-made Outer Jackets should be replaced every 6 months. Two Outer Jackets should be ordered when the TributeNight™ garment is ordered. A therapeutic initial fit is guaranteed under Solaris' "Sure-Fit" Warranty. Solaris also provides a warranty alteration that allows the patient to return their garment for an custom alteration any time within the first year of ownership to accommodate the further loss of volume that is routinely seen with regular use of this garment. There is no charge for this alteration service other than the return shipping.
