

# Stretch Foam Bandage

Stretch Foam Bandage can be used:

- for post-surgical swelling in the chest, breast or face
- to hold hot or cold packs in place
- as braking material to help prevent garment or bandage migration
- as sports wrap for ankle sprains, joint support

Product Features:

- self-adherent with no latex, no adhesives
- surface has good tack for use against bandage or garment migration
- won't stick to skin or hair
- soft, cushions and supports flexion areas without bulk
- non-binding
- thin, low-profile foam, conforms well to body contours
- 10% absorption
- washable, reusable

Available in two sizes. Purchase by the single roll, or in a discounted 6-roll pack
