

Sure Step socks have been patterned off Simcan's famous Comfort Sock but with the addition of a unique anti-slip tread on the sole to provide extra traction and security when walking on smooth or slippery surfaces. The miracle stretch weave will accommodate almost any leg size without binding or restricting the wearer's natural circulation. The memory retentive spandex throughout the leg and foot mean that they will not slip and bunch up on the ankle. It also allows them to be put on without effort. The Sure Steps are further enhanced with a perfectly flat toe seam that will never irritate the wearer's toes. **This sock fits well over our Solaris quilted type leg garments for non-slip protection.**

**Sag Resistant:** Provides maximum resistance to slipping on the ankle.

Socks do not bunch up on the ankle and create pressure that could lead to abrasions and bruising, a critical concern to diabetics. This feature is also beneficial to those with limited mobility who find it difficult to bend and pull up sagging socks.

**Easy to Put On:** Ideal for those with limited mobility.

Even after many washes this sock can be put on the foot with minimal effort making it ideal for those with arthritis and the elderly. It is also ideal for those in assisted care situations.

**Seamless Toe:** Totally seamless toe provides the maximum in comfort.

Seamless hand-linked toe closure eliminates harmful ridges that can irritate sensitive skin.

**No Bind Top:** Will not bind or restrict circulation on most legs.

The miracle stretch fibers allow the sock to expand to almost any size leg without binding or reducing the wearer's vascular circulation even at the very top of the cuff. Fits well over most of our Solaris quilted-type garments.

**Anti-Slip Grip:** Helps prevent slipping on smooth surfaces.

The silicone grip pads provide increased traction and help to reduce the chance of slipping on wood or tile flooring.
