

Solaris Product Guide for Genital Lymphedema

SP-19 Sweet Spot Swell Spot

The Sweet Spot relieves discomfort, pain, and pressure from perineal swelling, labial swelling, & vulvar varicosities. The Sweet Spot is the size and shape of a panty liner for maximum comfort and can be worn inside or outside of underwear. It features a one-sided non-skid surface to prevent repositioning with normal movement and is machine washable.

Measures approx. 7 x 14 cm.

SP-05 Katina Swell Spot

The Katina can be used like a larger Sweet Spot where more compression or coverage is needed. Therapists and patients have come up with creative applications for this Swell Spot. It can be worn under compression shorts or it can be encased in tubular gauze and suspended from a belt. It is available in two sizes.

Small: 10 x 38 cm
Large: 18 x 42 cm

SP-15F and SP-15M Labia and Scrotal Swell Spots

The Labia Swell Spot features a tapered design to enhance comfort while wearing and provides lower abdominal coverage to direct fluid away from the genital area. This Swell Spot may be worn inside or over underwear.

The Labia Swell Spot applies gentle compression on delicate tissue.

The Scrotum Swell Spot features a tapered design to enhance comfort while wearing and provide lower abdominal coverage to direct fluid away from the genital area.

The Scrotum Swell Spot is designed to gently cradle the scrotum. This design accommodates scrotal circumference up to 27 cm. Customization is available to accommodate other diameters. Call for more information.

Both of these Swell Spots measure approximately 30 cm x 50 cm.

Custom Swell Spots are also available; please give us a call for more info and to discuss your needs.

Tribute Shorts: TT-JG & TT-JF

Tribute shorts are made with the same fabric, foam and quilted channels as all of our Tribute garments. They are perfect for addressing lower truncal swelling, including genital lymphedema in both women and men. They are custom-made to each patient's personal measurements, like all Tribute garments.
